DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Ariav discloses a sensor 50 including a body of soft elastomeric material 53 with a sonic transmitter 51 and sonic receiver 52 carried by the body in spaced relation to each other. The elastomeric body being arranged around the chest of a patient, and the transmitter/receiver being disposed to provide a measurement of respiration rate based on the changes in locations between the transmitter and receiver during respiration by the patient (Abstract, paragraphs [0061] and [0080]). Bowers discloses a sensor 10 including a piezo-electric film transducer 30 having metallized inner and outer surfaces on a spiral tube 11 prepared by wrapping it on a mandrel 21 (Abstract, col. 4, lines 5-10, col. 5, lines 7-35).

However, none of the prior art alone or in combination teaches or suggests an x-ray tabletop having a securing device and a pulley coupled thereto, wherein a first portion of the plastic cord extends between the securing device and the pulley, the securing device and the pulley being positioned on the tabletop to allow the chest of the person to be disposed between the securing device and the pulley as claimed.

Based on the above observations, claims 7, 8, 20, 21 and 22 are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
